Profile

I am a **Computer Engineering** student committed to improving interactions between people and technology. With skills in conflict resolution, I approach challenges collaboratively.

Passionate about new technology and creating interactive visuals, I enjoy refining my creativity and transforming concepts into engaging digital experiences. I am eager to contribute to **frontend and backend** related development with the intention of enhancing user experience & improve system performance.

By the time I complete my degree, I will be looking forward to enrolling in a **Master's** program to further advance my expertise in **software development**.

Academic Formation

UAB - Sept 2022 - Current

Computer Engineering

Experience

Energiot - Feb 2025 - Current

Full Stack Engineer

Designed, developed, and maintained full-stack services. Implemented scalable architectures and optimized data flow using Supabase, Prisma, Upstash. Built dynamic dashboards, interactive maps, and user-centric features to visualize data effectively. Created and managed APIs built from scratch for IoT devices, ensuring reliable data ingestion, processing, and integration.
